NELiX® Web Modules
Our MODULE-BASED solutions are aimed to enhance the performance of your website

Through the course of our experience, we have found that there are many features that are used time and time again. Rather than re-develop everything from scratch, as many development firms do, we have taken these common features and created a library of modules that we offer at an affordable cost, much less than the time it would take to redevelop from scratch. We use these modules in every project we can in order to help save our customers money.

Members Only	**Adds a secure "members only" area with password protection** • Sensitive & proprietary content is easily restricted to authorized users • Additional permission levels can be added to allow for a second tier of user authorization	Price: Call 888-318-1388
